## Energy Savings Agreement

Name: \_\_\_\_\_ Phone: \_\_\_\_\_

Address: \_\_\_\_\_ City/Zip: \_\_\_\_\_

Email: \_\_\_\_\_

We would like to inform you of our **Energy Savings Agreement**. Your HVAC system is most likely the single biggest use of energy in your home. Our Energy Savings Agreement has been designed to help ensure that you are getting the most for your money and use out of your system. What should you expect from your service technician during an ESA Visit?

- Check system functions, safety controls and adjust the operating sequence where appropriate.
- Inspect electrical components and connections.
- Check amp draws, volts on motors and compressors.
- Change dirty air filters and inspect blowers.\*\*Filters available for purchase\*\*
- Inspect and blow out condensate drains.
- Clean condenser coil with water.
- Check thermostat operation and temperature differential.

**Energy Savings Agreement** includes (2) visits. One in the **Spring (March, April, May)** and one in the **Fall (October, November, December)** to insure that your system is working optimally for the upcoming seasons. **Energy Savings Agreement** typically pay for themselves through higher efficiency, lower utility bills and lower repair costs as we offer 10% off parts and labor for **Energy Savings Agreement** customers. This **(Excludes Equipment and Accessories)**. Having your system maintained will result in fewer systems failures and a longer life span for your equipment.
